

DAYENG FOUNDATION

Important investigation report

Scientific investigation report the Science Center of the Dayeng Foundation

**Topic and content of the study:
Temporal and regional development of diseases whose cause
and connection to economy and politics**

**Head of the scientific investigation: Prof. Dr. Dr. Lupus Dayeng
Assistance: Dr. Johann Menser, Dr. Stefanie Hillinger**

Support: The International Network of the Dayeng Association (26 scientists and 48 physicians).

Statements from politicians, intelligence officials, country pharmaceutical industry staff, secret information from WHO insiders, UNO, UNICEF, CNN media staff.

Period of scientific investigation from August 2013 to September 2017.

Contents:

- 1. Medical examination results of the organisms of humans in different countries and regions. Health status, intelligence and living conditions in the regions**
- 2. The relationship between health and industry**
- 3. The relationship between health and politics**
- 4. The influence of the public media**
- 5. The background for this situation**

Preface:

The results of this scientific study are very explosive.

The results provide insight into the actual events and circumstances of a global system that citizens of every country have no control over.

It is the interplay of big business and politics on behalf of the strongest power behind the scenes.

For the scientific investigations, both the medical and the investigation of the backgrounds, we needed more than 4 years. It was not easy to find the insiders who were ready for an interview.

Due to the explosiveness and outrageous results of this research, most people will either be shocked or ignore these results due to cognitive dissonance.

However, ignoring these facts will cause the situation to worsen.

It is therefore important that as many people as possible take these results seriously and draw conclusions from them.

If these facts are ignored, then at least the next generation of humanity will have no chance to change anything. Many millions of people will die and millions of people will never again know what it's like to live a healthy life. Likewise, a free life will no longer be possible.

In this research report, we have confined ourselves to the facts, we have renounced our own opinions. Only in this way can a neutral scientific result be achieved.

1. Medical results of human organisms in different countries and regions. Health status, intelligence and living conditions in the regions

In the following countries, we examined people for their health, both organically and mentally, and their living conditions.

USA (Florida, Georgia, New York, Wisconsin, Missouri, Texas, Nebraska, Montana, Washington, California), Southern Canada, Europe (United Kingdom, France, Germany, Austria, Switzerland, Italy, Spain, Norway, Sweden, Czech Republic, Poland, Romania). Western Russia, Brazil, South Africa, East China, India, Southeast Asia.

USA results as a percentage of the total population:

4200 people were examined between the ages of 5 and 70 years. Health: 89% of people have a weak immune system. We found many foreign substances in the body: aluminum, fluorine, strontium, barium, mercury, formaldehyde, traces of other toxic chemical compounds. 81% of all people have more or less health problems. 72% additionally suffer from allergies. Investigated deaths showed that a great many people died from relatively harmless illnesses. This confirms the result of very weak immune systems.

The average intelligence quotient is 88. Thirty years ago, the intelligence quotient in the US was 106, a difference of 18. 99.4% of Americans use only the mainstream media as a source of information. Most households have several TVs.

97% of Americans consume pharmaceuticals daily. 99.8% of Americans eat mainly food from the supermarket. The central drinking water in the studied regions contains several chemicals, including fluorine, chemical salts, chlorine and traces of antibiotics.

South Canada results as a percentage of the total population:

3100 people were examined between the ages of 5 and 70 years. Health status: 79% of people have a weak immune system. Found foreign matter in the body: aluminum, fluorine, strontium, barium, mercury, formaldehyde, traces of other toxic chemical compounds. 78% of all people have more or less health problems. 64% additionally suffer from allergies. Investigated deaths showed that a great many people died from relatively harmless illnesses. This confirms the result of very weak immune systems.

The average intelligence quotient is 92. 30 years ago, the intelligence quotient in the US was 109, a difference of 17. 97.6% of Canadians use exclusively the mainstream media as a source of information. Most households have several TVs.

92% of Canadians consume pharmaceuticals daily. 88.4% of Canadians eat mainly food from the supermarket. The central drinking water in the studied regions contains several chemicals, including fluorine, chemical salts, chlorine and traces of antibiotics.

Europe, results as a percentage of the total population:

3860 examined people between the ages of 5 and 70. Health: 82% of people have a weak immune system. Found foreign matter in the body: aluminum, fluorine, strontium, barium, mercury, lead, formaldehyde, traces of other toxic chemical compounds. 84% of all people have more or less health problems. 72% additionally suffer from allergies. Investigated deaths showed that a great many people died from relatively harmless illnesses. This confirms the result of very weak immune systems. The average intelligence quotient is 89. 30 years ago, the intelligence quotient in Europe was 112, a difference of 23. 99.2% of Europeans use only the mainstream media as a source of information. Most households have several TVs. 79% of Europeans consume pharmaceuticals daily. 94.9% of Europeans eat mainly food from the supermarket. The central drinking water in the studied regions contains several chemicals, including fluorine, chemical salts, chlorine, lead and traces of antibiotics and anabolic steroids.

West Russia, results as a percentage of the total population:

3140 people examined between the ages of 5 and 70. Health: 76% of people have a weak immune system. Found foreign matter in the body: aluminum, fluorine, strontium, barium, lead, formaldehyde, traces of other toxic chemical compounds. 81% of all people have more or less health problems. 67% additionally suffer from allergies. The average intelligence quotient is 92. Comparisons of the average intelligence quotient to earlier years are not available. 68% of people in this region consume pharmaceuticals daily. 79% feed mainly on food from the supermarket. The central drinking water in the studied regions includes several chemicals, chemical salts, chlorine, lead and trace fecal matter.

Brazil, results as a percentage of the total population:

Health: 43% of people have a weak immune system. Found foreign matter in the body: aluminum, fluorine, little traces of mercury, some traces of toxic chemical compounds. Only 19% of all people have more or less health problems, these are mainly wrong nutrition. Only 3% suffer from allergies. The immune systems of the examined humans were predominantly healthy in the examined humans. The average intelligence quotient is 104. Earlier values are unknown. 87.5% of Brazilians use only the mainstream media as a source of information. Only 27% of Brazilians consume daily pharmaceuticals. Only 36.8% of Brazilians eat mainly food from the supermarket. The central drinking water in the studied regions includes several chemicals, traces of fecal matter, chemical salts.

South Africa, results as a percentage of the total population:

2680 people between the ages of 5 and 70. Health: 74% of people have a weak immune system, mostly in the black population. Found foreign matter in the body: aluminum, fluorine, strontium, barium, mercury, lead, formaldehyde, traces of other toxic chemical compounds. 79% of all people have more or less health problems. 58% additionally suffer from allergies. Investigated deaths showed that a great many people died from relatively harmless illnesses. This confirms the result of very weak immune systems. The average intelligence quotient is 92. 30 years ago, the intelligence quotient in South Africa was 114, a difference of 22. 98.6% of South Africans use only the mainstream media as a source of information. Only 38% of South Africans consume pharmaceuticals daily. 48.9% of South Africans eat mainly food from the supermarket. The central drinking water in the studied regions contains several chemicals, including fluorine, chemical salts, chlorine.

East China incl. Hong Kong, results as a percentage of the total population:

3100 people tested between the ages of 5 and 70. Health: 79% of people have a weak immune system. Found foreign matter in the body: aluminum, fluorine, strontium, barium, mercury, formaldehyde, traces of other toxic chemical compounds. 78% of all people have more or less health problems. 62% additionally suffer from allergies. Investigated deaths showed that a great many people died from relatively harmless illnesses. This confirms the result of very weak immune systems. The average intelligence quotient is 98. 30 years ago, the intelligence quotient in the region was 110, a difference of 12. 98.4% of people in the region use only the mainstream media as a source of information. 64% of people consume pharmaceuticals daily. 86% eat mainly food from the supermarket. The central drinking water in the studied regions contains several chemicals, chemical salts, traces of feces and traces of antibiotics.

India, results as a percentage of the total population:

Health: 81% of people have a weak immune system. We found many foreign substances in the body: aluminum, a lot of fluorine, strontium, mercury, formaldehyde, traces of other toxic chemical compounds. 84% of all people have more or less health problems. 61% additionally suffer from allergies. Investigated deaths showed that a great many people died from relatively harmless illnesses. This confirms the result of very weak immune systems. The average intelligence quotient is 96. 30 years ago, India's intelligence quotient was 112, a difference of 16. 86.8% of Indians use only the mainstream media as a source of information. 64% of Indians consume daily pharmaceuticals. 61% of Indians feed mainly on food from the supermarket. The central drinking water in the studied regions contains several chemicals, including fluorine, chemical salts, a high proportion of faeces and chlorine.

South East Asia, results as a percentage of the total population:

4120 examined people between the ages of 5 and 70. Health: 81% of people have a weak immune system. We found many foreign substances in the body: aluminum, fluorine, strontium, barium, mercury, formaldehyde, traces of other toxic chemical compounds. 78% of all people have more or less health problems. 56% additionally suffer from allergies. Investigated deaths showed that a great many people died from relatively harmless illnesses. This confirms the result of very weak immune systems. The average intelligence quotient is 78. Thirty years ago, the intelligence quotient in Southeast Asia was 96, a difference of 18. 98% of people use only the mainstream media as a source of information. 62% consume daily pharmaceuticals. 79% of the people eat mainly from food from the supermarket. The central drinking water in the studied regions contains several chemicals, including fluorine, chemical salts, some very much chlorine and traces of fecal matter.

2. The relationship between health and industry

An interview with a former WHO employee in Geneva. The former employee, who was responsible for international coordination, does not want to mention his name in public, out of fear of reprisals. The World Health Organization (WHO) is the United Nations Coordination Agency for International Public Health.

The WHO is a United Nations specialized agency based in Geneva. The WHO was founded on April 7, 1948, shortly after the founding of the CIA (no coincidence), with the goal of global control in all health issues.

Question: What is the role of the WHO?

Answer: WHO was not created to protect people from disease. WHO is a control and coordination organization.

Question: What is the WHO controlling?

Answer: It is important to understand that WHO is not an independent organization, nor is it a non-profit organization. WHO controls health status and medical care internationally. WHO is mainly funded by the pharmaceutical industry. Accordingly, WHO coordinates the provision of pharmaceuticals.

Question: But from the outside, all this looks like WHO is acting in the interest of the people.

Answer: You see, pharmaceuticals are not what most people understand. Pharmaceuticals are there to generate profits. That's why WHO makes sure that the profits of the pharmaceutical industry are always growing.

Question: But how can WHO ensure that profits are always rising for the pharmaceutical industry?

Answer: There are many ways. WHO publishes fictitious statistics and fictitious investigative reports. Then the WHO claims that dangerous infections and pestilence are to be expected and invents a worldwide pandemic. This has worked so many times well. The public media play an important role here. These fake pandemics are making the pharmaceutical industry billions in profits.

Question: But the pharmaceutical industry is not just making profits from vaccines, is it?

Answer: No, of course not, but the vaccines make up a very large share of the profits of the pharmaceutical industry. You see, infants are being vaccinated in almost every country. These vaccinations are being promoted by the WHO as necessary and important. However, there are no long-term studies that vaccines actually prevent infections. However, there are many studies that say the opposite is true.

Question: But this is how people are lied to, does not anyone notice?

Answer: Yes, but few people and these people are not taken seriously by the majority. About 20 years ago a magic word was created that regulates everything.

Question: What is the magic word?

Answer: The magic word is conspiracy theory. Whenever unpleasant questions are asked, one says the word conspiracy theory and the mass of people can be deceived. But there is still cognitive dissonance that prevents people from believing these critics. The mass media ensure that people only hear that and see what they should hear and see.

All these statements are confirmed by Dr. John Virapen (former representative of pharmaceutical manufacturer Eli & Lilly)

Question: Is that to be understood that pharmaceuticals should not help at all?

Answer: Pharmaceuticals have never been able to cure diseases. This will not be the case in the future either. An example: The German chemical company BEYER produced weapons of mass destruction in World War I and World War II. After the war, this company then produced pharmaceuticals, in other words, not much has changed, only the name is today Pharmazeutika. This company makes about 40 billion to 50 billion EURO profits per year and pays no taxes. That makes clear how big the power of BAYER is. All pharmaceutical companies around the world use the profit principle, healthy people do not make profits, do you understand? The WHO is, so to speak, the PR department of the pharmaceutical industry.

Interview with an employee of UNICEF, he was 6 years for international coordination responsible.

Question: What is the mission of UNICEF?

Answer: UNICEF is full of corruption, many on the upper floors are enriched by the donations. The managers receive expensive cars and receive luxury vacations. All this has nothing to do with a relief organization. The managers help themselves and their bank account. This is unfortunately the reality, I have often seen it. Originally, UNICEF was supposed to help children who live in crisis regions and war zones and need help. That's what I believed at the beginning of my work at UNICEF. But it is completely different. It's like this: First, countries are bombarded mostly by the US Army and then UNICEF is sent to these regions to help the children in the devastated countries. That's how you get the appearance of humanity. All this is completely paradoxical.

Question: How does UNICEF help?

Answer: Some foods are brought to the regions and medicines are distributed. On these occasions, the children, but also the mothers are injected with chemical substances. We did this in Africa, Syria, Libya, Iraq, Afghanistan, Southeast Asia and other countries.

Question: What are these chemical substances?

Answer: I do not know all the ingredients of these vaccinations. But I can confirm that the vaccinated mothers and children did not have children later.

Question: You were sterilized?

Answer: Yes, I'm sure. But other pharmaceuticals were given to the children. Later, the children often had high fever, rash, gastrointestinal discomfort and many children died later.

Question: But that has nothing to do with help, on the contrary. How do you explain that?

Answer: I believe that the real purpose of UNICEF is birth control, especially in countries where economic interests exist. I think it's about depopulation and then controlling those lands and exploiting the mineral resources. It is about political and economic interests.

Question: But if that's really so, why does nobody know?

Answer: In crisis regions there is chaos, in chaos you can hide a lot, nobody notices something. Now and then you can find some true background information in the alternative media, but these messages are then referred to as conspiracy theory, the ordinary citizens read these messages anyway not. I no longer work for UNICEF, I do not want to be involved in these machinations anymore. If people knew what was actually being done with the donations, then nobody would donate more.

3. The relationship between health and politics

Interview with a United Nations staff member New York in a senior position.

Question: What is the mission of the United Nations?

Answer: The official task is: peacekeeping and conflict prevention, protection of human rights and fundamental freedoms, and promotion of international cooperation.

Question: And how is the unofficial statement about the task he UNO?

Answer: Well, I think you know that. The UN primarily represents the interests of the financial elite and big industry.

Question: Could you please clarify that a bit?

Answer: It is no coincidence that the headquarters of the UNO is in New York. The UN has only an alibi function. People in the world should believe that the UN is acting in the interest of all humanity. But that is not so, the only interests that the UN represents are the interests of the financial elite. You can already see this from the fact that the US armed forces, without a decision of the UN, begins wars in other countries.

Question: But why is not the US punished by other UN member states?

Answer: All member states of the United Nations are highly indebted to the financial elites and the states that wanted to escape the power of the financial elite were bombed, as we know. All states have big financial debts on the financial elite. Therefore, no member state dares to criticize, all states are dependent on this financial system that governs the world. Very rarely does a UN member say anything critical. If so, then that voice dies down after a very short time, because the sanctions would be too big. It's all a big theater.

Question: What impact does the UN have on the health systems of other countries?

Answer: The UN has a very big power, but the real rulers are in the background. The UN is a power instrument of the financial elite. To influence health care systems and boost the profits of the pharmaceutical industries, the UN established the World Health Organization (WHO) in 1948. Thus, a direct link between the UN and industry for the mass of people is not recognizable.

Question: So the UN also works for the industry?

Answer: Yes, of course, the financial powers and big industry has global power. After all, we live in a world dominated by a gigantic financial system. This financial system controls all of these organizations for the benefit of big business. All these organizations including UNICEF, IMF, NATO, WTO, ITU, WWG and so on. International courts, such as the International Court of Justice (ICJ) in The Hague, do not work for justice; these courts work for this system of power elites. Complaints against governments, big banks or big business are always rejected. Therefore, the pharmaceutical industry can do whatever it wants, there are no consequences. Many millions die every year from the effects of pharmaceuticals, yet managers never go to jail. If, on the other hand, only one person dies due to a faulty product from a small business owner, then this small business owner will be punished.

Interview with a scientist who had worked for the CIA for many years.

Question: We have learned from many sources that ordinary citizens do not receive the same medical treatment as powerful and wealthy people. Can you confirm that?

Answer: The question is not whether there is an equal or unequal treatment. The question is whether ordinary citizens actually receive treatment that helps them. The rich and powerful and also the European royal families reach a very old age and do not suffer from cancer or other diseases or even the invented disease AIDS.

These people do not eat the same, poisoned food as the mass of people, they do not consume pharmaceuticals made for the masses of people, and they do not get vaccinated, why? There are no epidemics or pandemics, they are pure invention. The lifetime of the normal citizen therefore shortens steadily.

Question: But why is this panic of alleged pandemics constantly spreading?

Answer: So it is very easy for as many people as possible to inject these toxic ingredients.

Question: Why are people injected with these toxic ingredients?

Answer: To keep people in a state of constant illness and make them more stupid.

Why?

Sick and stupid people do not ask unpleasant questions and they become lethargic, often resigned and self-doubting. These people never dream of doing something against the rulers.

Question: Yes, that's our research result. The intelligence of the people has decreased drastically.

Can you clarify everything?

Answer: We have managed, through targeted manipulation, to make people even afraid of freedom. An example: If you lock pets such as rabbits or other small animals in a cage for a long time and then set them outside, then these animals do not run around happily and enjoy their freedom. No, these animals do not move an inch. These animals are afraid, afraid of freedom. It works with people as well. If we tell people over and over again, with the help of the mass media, that they can not live without the rules of the state, then they will believe it. Assuming that all state power would no longer exist overnight, no offices, no police, in fact nothing. What do you think would happen? Some would plunder shops and do similar things, but most people would feel very anxious and helpless. That's perfect manipulation.

Question: But this manipulation can not take place by the mass media alone, exist other measures?

Answer: The mass media are only responsible for spreading the manipulation. I've been working in a department where research is being done to influence consciousness. It is about influencing the prefrontal cortex in the front of the brain. The prefrontal cortex is responsible for critical thinking, problem solving, and creativity. This area should be influenced to such an extent that, above all, critical thinking is eliminated. This has already been achieved by most people. But also the occipital lobe of the posterior brain area is influenced to manipulate the visual information. That also works very well. People are guided and influenced by certain visual information without thinking or doubting anything.

Question: How are these influencing substances brought into the human organism?

Answer: These substances are added to the vaccines, the substances are found in pharmaceuticals, personal care products, soft drinks, fast food products and much more. But there are also direct dissemination possibilities over the air. The viruses we created were and will be distributed in this process. People would never understand or believe all that.

Question: But there are also people who are still dealing with the background of this system. Especially in social networks, these people are active. Could this not contribute to the enlightenment?

Answer: People, especially in the US and Europe, have become so manipulated that they are no longer a threat to the elites.

We've been spreading a lot of crazy things, on social networks, on YouTube, and so on. We have said, with the help of straw men, that the earth is hollow or flat, we have said that there are lizard people and much more. So, if there are people who say or write something that could hurt the elite, then it's put into the category of crazy or conspiracy theory. The mass media say then: You see, these are just as crazy as these people who believe the earth is flat.

Question: How do you recognize that this influence works?

Answer: We observe forums and the entire social networks. On the basis of the comments we can see how the state of mind of the people is.

Question: Are there any other ways of observing humans?

Answer: Oh yes, very many. Whenever people turn on their computer, their smartphone, and so on, and online, everything is analyzed. We receive all information about people from all known and unknown IT services.

Question: These companies voluntarily give all their customer information to the secret services?

Answer: Every IT company is either sponsored or destroyed by the system. If a company does not want to play, it will be destroyed.

Question: So it's no coincidence that Microsoft, Google, Facebook, and so on have become so powerful?

Answer: It is by no means a coincidence. Through these companies, we get all the important information about all humanity. Without these companies, global control and manipulation would not be possible. If a new IT company has the potential to help us control people around the world, it will be promoted. Many software programs from Microsoft include control functions and it is constantly evolving. In the foreseeable future, no one can go to the bathroom without being watched.

Question: The scientific department you worked in is actually responsible for fending off enemies and finding ways to prevent them. But if you look at it closely, then the real enemy is the normal citizen. Can you say that so?

Answer: I can not argue with that.

Question: How do you know that this all works well?

Answer: This is constantly being checked. There are bits and pieces of truth told publicly to check if these truths are even perceived. In the past this was done very carefully and later more and more openly.

Question: Can you give us examples?

Answer: Barak Obama, for example, publicly stated that we are unable to leave Earth orbit towards the universe. Nevertheless, most people continue to believe in a moon landing that has taken place. Or in Europe and especially in Germany, politicians are constantly telling the truth.

Question: What do the German politicians say?

Answer: They say, for example, in the mass media, that industry has the power and that politics allows itself to be guided by the industries. Or they say publicly that Germany has no real government and that this Germany is governed by a company. These are all true facts, but people are no longer registering these facts because the brains are already too much influenced. People are now perfectly prepared for central control by the power elites. Resistance or a revolution are therefore no longer to be feared.

4. The influence of the public media

Interview with an editor of "CNN International".

Question: Who is CNN and what does CNN do?

Answer: CNN is an American news channel committed to providing people in all countries with real and unadulterated news to show the real events of the world to everyone.

Question: Are you serious?

Answer: Of course not, not even the most manipulated person in the world would believe this bullshit. I'm just having fun. I would like to use a quote from Thomas Jefferson: "Only lies need the support of state power, the truth stands by itself." But with the word of state power, Jefferson had meant another violence, it's the power in the background, the power of the financial system, and the power of London.

Question: What do you mean by power from London?

Answer: I mean the English royal family. There are two great powers governing this world, it is the financial elite and the English royal family.

Question: Can you clarify that?

Answer: The English royal family owns more than 16% of the country on earth, including Australia, large parts of Canada and many other parts of the country in other regions. No other family owns so much land. On the other hand, the Rothschild, Rockefeller and several other families have power over the monetary system. Both powers control and govern this world. However, the English royal family is far more powerful than the Rothschild or Rockefeller families, for when the financial system collapses, the English royal family still owns that many lands. Although the families Rothschild, Rockefeller and others, also own land and real estate in several countries, but in comparison to the English royal family, this is very little.

Question: Now we know who has the power in this world. For us as scientists, the question arises, what influence do these powers have on human health?

Answer: The influence is tremendous, these two powers decide life or death and no one can do anything about it. If this elite wants millions of Africans to die, then these Africans will die. The media then substantiate this mass extinction with an epidemic.

Question: Do you mean the so-called AIDS epidemic and possibly also Ebola?

Answer: As a scientist, you have been researching for a very long time the connections between civilization diseases, politics and industry, I know your scientific investigations. That's why you already know the answer.

Question: What would happen if you were to publish these facts as an editor?

Answer: Well, what should I say? I would be dead. But that's just theory, this truth would not be sent. There is a control group that prevents the publication of such truths.

Question: Germany is governed by a company?

Answer: Yes, of course, there is no legally binding government in Germany. That's what these so-called German politicians even say openly in the mass media.

Question: But why do not most people still know that?

Answer: Because most people do not want to know it, and also in Germany, the game works very well with the word conspiracy theorist. Nobody wants to be called a conspiracy theorist. People are used to telling them what to believe. This works very well for a very long time. Everyone is doing what the crowd is doing. People are used to standards. No one leaves the system to be ridiculed as an outsider. People do not want to think, we do that for them.

5. The background for this situation

Benjamin Disraeli, British Prime Minister (1804-1881). Quote from his novel *Coningsby*: "You see, my dear Coningsby, the world is ruled by other people, as it imagine those citizens who have no insight behind the scenes."

The richest and most powerful families in the world have the power and control over everything in every sense. Every action of these elites has a big impact on the lives of all people. The power and the activities are spread all over the globe and your greed for wealth and power knows no bounds. For this power elite, people are just things to exploit. People who can not be used are the same thing to garbage, human waste.

Baron Nathan Mayer de Rothschild (1840-1915) said:

"I do not care which puppet sits on the throne of England and governs the British Empire, where the sun never sets. Because it is only the person who controls the British money that has the say in the British Empire, and that person is me."

What was then true for the English Empire is just as true for all countries today, because all countries are now dependent on this financial system.

The entire science degenerated into a tool with the help of which humanity is subjugated. Thus, science becomes a dangerous tool that is exclusively in the hands of a small group of people. These people buy the necessary scientists and use the findings from science for their purposes. The power that grows out of this appropriation is then exploited to its own advantage, but to the detriment of all humanity.

Professor Carroll Quigley writes:

"The power of finance capitalism had a broader goal, nothing less than the creation of a world system of financial control so as to be able to determine the political system of each country and the economy of the whole world." This goal was achieved through the creation of private central banks.

President John F. Kennedy said in 1961 to media representatives:

"The word secrecy should be contrary to an open and free society."

On June 4, 1963, President Kennedy said that instead of the Federal Reserve Bank, the State Treasury should print the dollar bills. (Executive Order 11110). He also ordered that after printing the old banknotes should be confiscated and the new ones should be circulated. A few months later, on November 22, 1963, Kennedy was the victim of an "assassination attempt" in Dallas. After the takeover of Vice President Lyndon B. Johnson, this took immediately the instructions of Kennedy back. Anyone who is actually to blame for the death of Kennedy should be understood by every logically thinking person.

We, the independent research center of Dayeng Foundation, will continue to conduct independent research. We will not bow to any power in the future and we will not sell ourselves. We know that we are probably the only scientists and doctors working exclusively for the benefit of the people. Nevertheless, we will not give up our philosophy.

As long as there are still people who have kept their own thinking, we will work for and help them. Our therapies and treatments, developed from in-depth scientific research, are the most successful worldwide and we will continue to help as many people as possible in the future. We will continue our independent research and we will continue to make all facts publicly available to everyone.

Each person decides himself whom he trusts.

Investigation Report Completed
Head: Prof. Dr. Dr. Lupus Dayeng
